Subject: Specialty coating chemicals – introduction

Dear Deborah,

Good to catch up at the trade fair last month. As discussed, I've now set up Ashworth Specialty Solutions to provide independent technical and commercial advisory support across the specialty coatings supply chain, drawing on my background in the sector.

Where it's helpful, we can also assist with sourcing and supplying certain specialty coating chemical lines directly through our supplier network, on a project basis, where this offers better terms or continuity than your current arrangements.

Happy to put together an indicative proposal for the product lines we discussed if that would be useful – let me know.

Best,
Julian
